So, good, what so good about this new version of Lightroom? Well, for starters, it's now a free program. Update: Adobe has dropped this requirement. The good news, however, is that instead Adobe is offering a free trial version of Lightroom (which is equivalent to Lightroom 5). This is a very smart move on Adobe's part. They had only few days to prepare for this game changer, so I think the trial is the way they went. It is somewhat like from Windows CE to Windows Mobile. If you are interested in learning Adobe Lightroom Make sure you look it up on the Adobes website. If you like this program, add it to your preferred download list. I think you'll agree it's exactly what you've been waiting for. Adobe Lightroom 5 is on a mission. That mission is to save every photo taken with every camera for every photographer — from the most sophisticated user to the least. With its smart, intelligent and intuitive interface, users of all styles, levels of experience and knowledge will find it easy to do what they want, when they want. It's a photogenic wonderland. Many of us have, at one time or another, had a woodsy, artistic personality that wanted to try and draw, paint, or make a poster. Unless you wanted the "real thing"—a professional cartoon or fine art painting, it was difficult to find a software package that did any of these tasks well, let alone for free. Thanks to Adobe, such people can live out their creative whims with a few cheap strokes of a mouse or a few keys. Moreover, other people with a taste for the arts can add their own soulful touches on a Photoshop project for a fraction of the price of a professional?
