After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

With the introduction of both Lightroom and Photoshop Touch for iPhone and iPad, Apple smacked down any long-anticipated full-blown support for Lightroom, Adobe's powerful but expensive desktop app. While I do applaud Adobe for the immediate response to the iPhone and iPad release, I think they could have handled things better. Lately, Price and Adobe have been in competition, and now with Adobe Creative Cloud, both are forking over \$24/month for access to the same tools and features. I don't think Adobe should have sold Lightroom separately. Similarly, Adobe opened its first-generation Lightroom mobile app without an iOS version, so Apple users were left waiting.
